

Águas de Lindóia, April, 24 of 2006

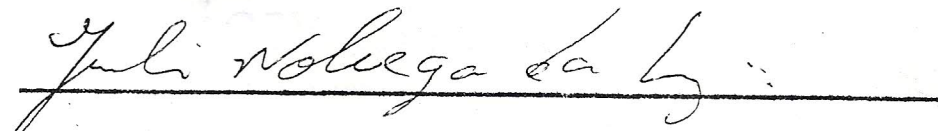

Letter nUmber 001/24/04/2006-two ways

Dear Sir(Maddan)-United Nations Environment Programe,

This information is much important because the global heating will make many countries dissapear as fast as limit of Science knowledge, and will be in 2039 when we're going to have 63º degrees of temperature in some places of worldwide. Now I am worried about this situation because Holland, Japan, New Zealand, Sri Lanka, Indonesia, Tuvalu, Maldivas, etc may ~~Disapear~~ be banish of the world Map.

So, I am asking you to prevent all the people because is going to be worse than Scientific studies show nowadays.

Yours Truly,

Prof. Jucelino Nobrega da Luz
